Explanation

- **Rows and Columns:** The numbers (1-9) represent the number of generations from the common ancestor for each person.
- **Relationships:**
 - Direct descendants are shown as "Son," "Grandson," "Great-grandson," "Great x2-grandson," etc.
 - Siblings and their descendants are shown as "Brother," "Nephew," "Great-nephew," "Great x2-nephew," etc.
 - Cousins are identified by their degree (e.g., "First cousin," "Second cousin") and the number of generations removed (e.g., "1 generation removed").
- **Generations Removed:** This indicates the difference in generations between the two individuals being compared. For example, a "First cousin 1 generation removed" means one person is one generation further from the common ancestor than the other.
